

How to Request a Quote

Lidco products are sold in wholesale quantities through a distributor network. All wholesale quoting must meet minimum order quantities (MOQs) and must be rounded to shipping quantities which are listed on each product page and on this chart. When requesting a quote please include the information listed in the instructions below including: quantity and part number for each of the products in your quote request.

01.

Navigate to a product and select “Minimum Order and Shipping Quantities” menu. Check product MOQs and shipping case quantities for orders over MOQ.

Lidco does not quote or ship partial case quantities. All orders must meet MOQ. For orders above MOQ, please round to nearest case quantity for product.

02.

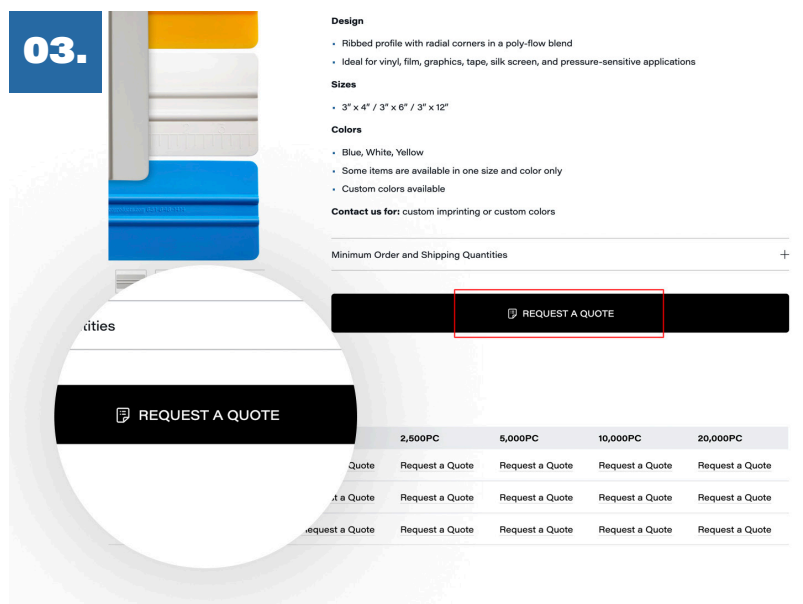

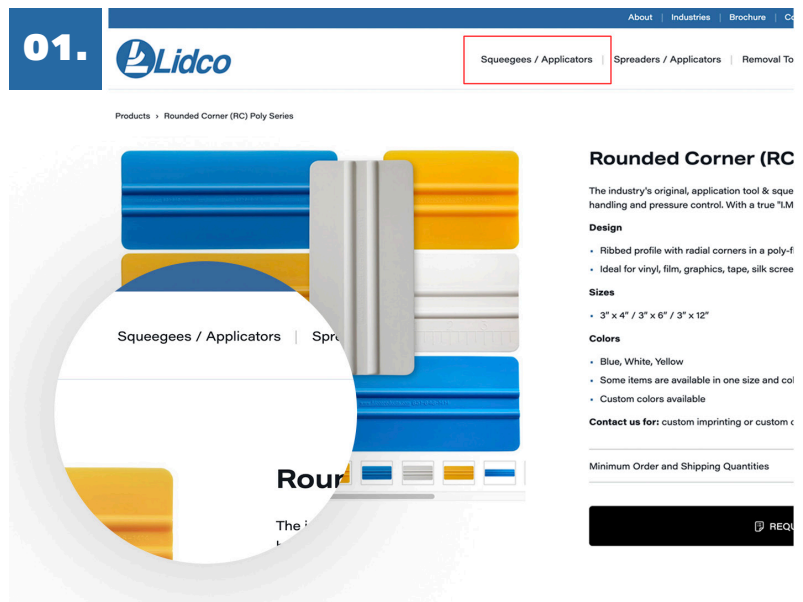

Note 4-digit product Item no.

Item numbers are listed below each of the product images and in the quantity price-break grids on each product page. You'll need the 4-digit number to request a quote.

03.

Select the Request a Quote button on product page

You will then be taken to a new page (step 4) where you will fill out the **Request a Quote** form.

04.

Fill out Request a Quote form completely

Please fill in all fields as directed on the Request a Quote form. Required fields have an asterisk.

04. Request a Quote

Fill out each of the form fields as best as you can. If you don't have information for a required field, just fill it out with n/a.
